Goshawk Global Fund

ISIN: IE00BMWVYH92

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Goshawk Global Fund (the "Fund") - Class G Sterling Accumulating

a fund within Vermeer UCITS ICAV (the "ICAV") which is an open-ended umbrella type investment fund with segregated liability between its sub-funds.

Waystone Management (IE) Limited is the Manager of the Fund.

Objective & Investment Policy

Objective

The investment objective of the Fund is to achieve long-term capital growth.

Investment Policy

To do this the Fund invests in the shares of a diversified range of global companies with a broad range of market capitalisations.

The Fund's investments will be limited to recognised markets, as detailed in the Prospectus for the ICAV.

The Fund is considered to be an actively managed Fund without reference to a benchmark or comparative index for performance comparison purposes meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

Currency hedging arrangements may be used to reduce the impact of exchange rate fluctuations between the share class currency and the Fund's base currency (GBP) on the value of investments held by the Fund.

The investment process entails current value and returns, future strategy and trends and the analysis of potential events.

Portfolio transaction costs may have a material impact on Fund performance.

Dividend Income that the Fund receives is automatically reinvested into the Fund and is thus part of the share value.

Further information on the Fund's investment objective and policy can be found in the Prospectus at www.goshawkam.com. This Fund may not be appropriate for those investors with a short investment horizon.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

You can buy and sell shares in the Fund on each business day in Dublin and London.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives may be used for efficient portfolio management and to manage the risk profile of the Fund.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio may be obtained from the address provided in the 'Practical Information' section below.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The share class has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free. The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

- Additional risks are detailed in the Prospectus including Investment Risk, Derivative Risk, Market Risk, Credit Risk and Liquidity Risk. This list does not purport to be exhaustive and risks of an exceptional nature may arise from time to time. As this Fund has such a broad selection of investment choices, there are many factors that could affect performance.

- These could include changes in the economic environment between and within the countries that the Fund has invested in, the performance of different industrial sectors, and individual securities.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which may be obtained from the address provided in the 'Practical Information' section below.
